

# Construction Management

Turf, Track & Court, LLC (TTC) is positioned to provide high quality construction administration services for your athletic facility projects. Whether the service would be administration of TTC designed projects or TTC brought in as a third party owner representative, TTC can provide the time and expertise to administer all aspects of your athletic facility project. Each project is approached in a systematic process to ensure the expected results. This process includes consistent client communication, outlining of a comprehensive project scope, schedule, and budget, and constant monitoring thereof.

TTC can provide pre-construction assistance with scope, schedule and budget. Value engineering services are provided as required to assist owners with the most cost effective projects possible. TTC's construction administration services include constructability reviews, value engineering, bid administration, bid recommendations, contract administration, shop drawing review, construction conferences, construction inspections, punch list preparation, and project closeout. Call us today to discuss your upcoming needs and expectations.
