Memberships:

Turf, Track and Court, LLC has had a busy summer and pre fall sports season maintenance schedule. We extend our appreciation to our regular clients, thank our new clients and look forward to our future clients offering unparalleled service. As we continue to grow, we would like to introduce Joe Bauder into our maintenance operations. Joe will play a dominant role within the maintenance division of Turf, Track & Court, providing field services as well as keeping our equipment in top working condition. Our desire to exceed expectations grows with every job, quality services and the continued commitment to excellence is our highest priority. We look forward to the opportunity to discuss your needs and identify if our services can be of benefit. Call us today.

Brian S. Bingeman, RLA

Following is a brief outline of service areas and projects we have had the pleasure to be involved with:

Rendered Plan View of Stadium Improvements

PROFESSIONAL SERVICES

Gettysburg Area School District: Stadium Improvements Feasibility Study / Master Plan

TTC is moving forward with preparation of a master plan for the existing Warrior Stadium. Improvements include replacement of stadium lighting, renovations to existing bleachers, new home bleachers, synthetic turf, synthetic running track and various other upgrades. Renovations will be done in conjunction with the Middle School project to minimize site disturbance. Many community members are excited about the renovations to the facility, which will bring many opportunities for both school and community events.

Central Dauphin School District: Stadium Improvements

Renovations have been completed and the fall sports season is off to a fresh start at Landis Field. Be sure to check out the improvements when visiting the facility; new lighting, bleacher renovations, new fencing, a new trench drain surrounding the playing field and the running track and field events have been re-surfaced. Stadium Improvements have given new life to the facility, not only aesthetically but the athletes and spectators have a safer environment for all sporting events.

Northern Tioga & Spring Grove Area School District's: Tennis Court Renovations

TTC assisted both Northern Tioga and Spring Grove Area School District's this past summer with renovations to their tennis courts. As construction administrator, TTC provided the expertise to supervise all aspects of the project to achieve the desired results by the School District.

Central Dauphin School District – Stadium Improvements

Spring Grove Area School District – Tennis Court

Northern Tioga School District – Tennis Court

G-MAX TESTING:

Benchmarking your Synthetic Turf

Annual G-Max testing will provide a regulated assessment of field condition based upon ASTM Standards. Testing should be in conformance with ASTM Standards F355-10a and F1936-10 to test for measured hardness. Initial G-Max testing creates a benchmark by measuring certain shock-absorbing characteristics of turf. Annual testing documents a commitment to field safety and allows for an unbiased field analysis. Call today to discuss the testing process or arrange for your field testing to be scheduled.

Triax 2010

MAINTENANCE

Topdressing Crumb Rubber

The addition of crumb rubber can benefit your synthetic turf in a number of ways; create a uniform playing surface, help fibers to stand vertical, and / or reduce the surface g-max. Over time the crumb rubber embedded within the turf fibers will migrate to the field perimeter and oftentimes off the field. Every athlete that participates on the turf will take away a few granules with each use. The overall in-fill depth will affect the playability and safety over the lifespan of the turf. It is extremely important to monitor the level of rubber, especially within the high use areas, goal crease, penalty kick areas, etc. TTC provides topdressing services to keep your fields performing to their highest level. Call today to discuss your needs and schedule a no cost field analysis.

OPENING DAY

Community

We have been anxiously awaiting the arrival of spring which is now in on the horizon. Opening day for baseball and other spring sports are fast approaching.
